WORK EXPERIENCE

Deso It Support Staff | Government Election & Committee Roles

Napico Elem School , Pasig City

2020-2022

- Provided on-site IT support by troubleshooting hardware, software, printer, and network issues during government election and committee operations.
- Configured and maintained computers, peripherals, and office equipment to ensure reliable and uninterrupted operations.

Web Development Freelances (Building Portfolio)

Remote, Pasig City

2023-2024

- Developed responsive websites and web applications using React, HTML, CSS, Tailwind CSS, JavaScript, TypeScript, and Node.js, delivering modern and user-friendly interfaces.
- Built backend functionality using PHP with MySQL and MariaDB, implementing CRUD operations, authentication, database integration, and REST API connectivity.

PROJECTS

Vinno: Smart Circuit Breaker System via Application (Mobile App)

- Developed an IoT-enabled mobile application that allows users to remotely monitor and control circuit breakers through a smartphone.
- Implemented real-time status monitoring, remote switching, and user authentication to improve electrical safety and simplify power management.

Barangay Information System – BIS (Web Development)

- Developed a web-based information management system for Barangay Sta. Cruz to digitize resident records, household information, and census data.
- Built an administrative dashboard with search, filtering, and report generation features, enabling faster record management and more efficient barangay operations.

ACTIVITIES

SHE++ PHLDEV(2025)

Pasig City

- Participated in technical talks, workshops, and networking sessions focused on software development, emerging technologies, and career growth.
- Engaged with industry professionals and fellow developers while gaining insights into modern web development, best practices, and current technology trends.
